

DEPARTMENT OF PUBLIC HEALTH DENTISTRY

DENTIST DAY – 6th March, 2017

The Dentist Day was celebrated on 6th March in our college in the reception area. An **“awareness skit”** was organized and performed by CRRI students and third year BDS students to educate the people about various dental problems and their treatment modalities which are available for prevention and cure. Various methods of replacement of teeth and ill effects of substance abuse were explained to the out-patients attending our college on that day. The celebration ended with a quote that **“Prevention is Better than Cure”**.

“Awareness skit” was performed by Third year BDS students
